

**Grill** | Sear the perfect steaks, pork chops or burgers on the EGG. High temperature “steak house” grilling – even at 750° F / 400° C – is quick and easy! Using the two dampers for accurate control, you can lower the heat to a more moderate temperature for other grilled foods. Fish and seafood turn out moist and tender with a flavor-packed crust unmatched by other grills.

**Oven** | Using the indirect cooking method with a Plate Setter, the Big Green Egg bakes bread, pizza, casseroles, cobblers and pies better than your **kitchen oven** ... you may never cook indoors again! The Big Green Egg retains heat and moisture so well that foods don't dry out! Poultry, lamb, beef and vegetables are naturally tastier because the juices and flavors stay locked inside.

**Smoker** | The **insulating** ceramics of the Big Green Egg allow you to precisely control the temperature even at low heat. A controllable 200 to 350°F / 93 to 177°C gives succulent results with turkey, ham, lamb, chicken, ribs or any of your favorite cuts, infusing them with the aromatic wood smoke flavor. Want to slow cook at low heat for sixteen to eighteen hours ... no problem!

**The Only Outdoor Cooker You Will Ever Need!**

## **How the EGG Works**

The Big Green Egg is a blend of the best of ancient wisdom, modern technology and proprietary processes, resulting in a far superior product that is stronger, more durable and provides better heat **insulation** than any other outdoor cooker on the market.

**Simple to Start** |The Big Green Egg reaches cooking temperature and is ready to use in just minutes. Big Green Egg brand natural lump charcoal is made in the USA from oak and hickory for superb performance and results. Lighting the charcoal is quick and easy, as the design of the Big Green Egg allows air flow to work like a fireplace. Use a natural **charcoal starter** or an electric starter; and never buy lighter fluid again!

**Precise Temperature Control** |You can grill, smoke and bake at exact temperatures by easily adjusting the patented air flow controls. You have total control over temperature at your

fingertips, maintaining accuracy within a few degrees! The Made in USA precision temperature gauge provides accuracy to 750°F / 400° C. Many indoor ovens cannot match the EGG's temperature control and accuracy!

**Safer to Use** |The Big Green Egg is extremely safe to use because the ceramic surface doesn't get as hot as a metal grill, and the heat source is protected within a ceramic fire box inside the base.

**Easy Clean Up** |The Big Green Egg features a stainless steel cooking grid and an elegant green exterior with a lifetime glaze that maintains its good looks and wipes clean easily without chemical cleaners. Inside, residual heat burns away any grease build-up – just like a self-cleaning oven.

**Patented Technology** | What makes The Big Green Egg by far the best cooking device of its kind are the patented components and state-of-the-art ceramic technologies that provide improved insulation, thermal shock tolerance and material strength. The high-quality ceramics used in each and every EGG will not crack or deteriorate over time, and many EGGs are passed down to the next generation. The Big Green Egg comes with a Best-In-Class limited lifetime warranty.

**If it doesn't say Big Green Egg, it isn't!**
